I've been interested in programming for about 4 years now, and am currently attending a Web development bootcamp at Coder Academy (online). I'm creative, have keen attention to detail, and excel at learning on the fly. I am a good communicator and enjoy collaboration, but I also work very effectively when on my own. Procrastination is not a big issue for me - I prefer to be productive.

Through independent learning, two years at UNI, and ongoing studies with Coder Academy, I have been exposed to and used numerous Web development technologies. I am most comfortable with the following:

- HTML5
- CSS3
- Sass
- JavaScript
- TypeScript
- Node.js
- SQL (MySQL/MariaDB)
- git & GitHub
- Bash (Ubuntu Linux 20.04 LTS)

From using these languages / programming environments I have experience with the following frameworks / packages:

- express
- express-handlebars
- webpack
- vue
- joi
- sequelize
- electron

In addition to my involvement in Web development, I have some experience with the following technologies:

- C
- C++
- Qt5
- Python

Recent Employment History

Barista at Just Another Cafe (Nov 2021 - present)

I make good coffee! I also enjoy interacting with customers (most of the time). Through 10 years of hospitality experience, I have developed good customer service and time management skills. At Just Another Cafe, I engage in all front-of-house tasks, including making coffee, smoothies, and juices, taking customer orders, running food, washing dishes, cleaning, etc..

Child Minding & Groundskeeping at a School (August 2018 - October 2021)

I did some childminding at a local school and they ended up asking me to also cover staff for cleaning duties in the morning and afternoon on occasion.

Kitchen Hand at Some Random Nursing Home (January 2018 - September 2018)

That's right. I used to work at a nursing home in the kitchen. There I was responsible for assisting the chef in preparing food for the residents, and delivering the food at mealtimes.

Seems a little quiet doesn't it?

I've also been studying IT for for the past two years at UNI. When I decided to defer and enrol in Coder Academy, I had a GPA of 6.25.
